

## A Little About On Call

Based out of Tallahassee, Florida in Leon County, On Call is one of the nations fastest growing computer repair and IT management companies, leading the way in small business technology innovation and implementation.

### A Brief Introduction:

On Call provides the micro, small, and medium sized business with both on-demand per incident support services and complete IT management solutions. Our typical clients are businesses with between 1 and 50 computers who are looking for a calculated approach to managing their IT needs.

Instead of reacting to problems when they occur, we help you from the start to create a plan for your business based on your specific needs. This allows IT costs to be expected and budgeted instead of being a big surprise. Best of all, our unique approach allows our clients to be proactive about managing IT in order to maintain continuous productivity and substantially decrease financial loss due to down time and emergency repairs.

As we continue to be in sync with our mission we have continued to keep prices fair and accessible to the small business while building a list of abilities that makes us the best choice for IT support no matter what your needs are.

We are looking forward to being of service to you. If at any time you have questions about us or the technology in your life, please don't hesitate to give us a call. We are always On Call for you!
